

***Clappaspis spencei*** Resser, 1939 (TH483)

*Clappaspis* → Aulacopleurida → Aulacopleurina → Aulacopleuroidea → Alokistocaridae

**Provenance** : US; Ohio, Liberty

**Formation** : ?Fm (see details)

**Age** : Middle Cambrian

**Details** : Cephalothorax, and with only a partial thorax at that. The specimen regrettably also underwent some erosion. The Alokistocaridae used to be placed into Ptychopariida (now more properly named "Uncertain Order"). [According to paleobiodb.org, the species is only found in 'Lead Bell Shale', known better as the Spence Shale]
