

Ellipsocephalus hoffi (Schloteim, 1823) (TH28n)

Ellipsocephalus → Redlichiida → Redlichiina → Ellipsocephaloidea → Ellipsocephalidae

Provenance : Czech republic; "Jince"

Formation : ? Fm

Age : Cambrian

Details : Complete specimen with some damage (the partial on top of which it lays was not worthy to get a separate numbering, for sure). A friend vendor was offered a box of Czech trilobites (mostly bits), and asked me to make an evaluation of the content (some tags had been displaced). In the end, I was offered the box at the little money I had left that day.
