

***Pachyaspis* sp.** (TH491 + 491a)

***Pachyaspis*** → "Order Uncertain" (ex-Ptychopariida) → Ptychopariidae

**Provenance** : US; Utah, Millard County

**Formation** : ?Fm

**Age** : Middle Cambrian

**Details** : Complete specimen missing librigenae, accompanied by the partial thorax of a slightly larger specimen (10 segments visible against 12 on the completer specimen). Piece comes from an old collection, and the prep looks like a commercial sandblasting job to me (neither of the specimens having been cleared properly from their surrounding matrix),

**Bought on** : 07/11/2021

**Bought at** : The Mixx, Herselt

**Event** : PaleoTime 2021
