

Bettonolithus gibbsi (TH479)

Bettonolithus → Trinucleida → Trinucleina → Trinucleoidea → Trinucleidae

Provenance : UK; Mid-Wales, Powys “Anticline”

Formation : ?Fm

Age : Middle Ordovician, “Llandeilo”

Details : Slightly eroded, near-complete specimen. I was unable to find an author for the species, which only shows the disadvantage of being an “amateur” (as contrasted to being a “professional”, whom gets access to manuscripts more easily, and therefore can do his research more thoroughly). The genus was previously named *Bettonia*, which is an invalid name.
