

Plagiura concava O'Malley, 1989 (TH236)

Plagiura → Ptychopariida → Ptychopariina → Ptychoparioidea → Ptychopariidae
CORRECTION : ***Plagiura*** → Uncertain Order → Ptychopariidae

Provenance : USA, Montana, Thompson Falls – Fishtrap Creek

Formation : Gordon Shale Fm, (bottom 6m)

Age : Lowest Middle Cambrian

Details : Incomplete (tiny) specimen (see also supplementary info on second page).

Bought on : 13/11/2016

Bought at : Wijnmaal, Remi Site

Event : PaleoTime 2016

The shale was somewhat fissured, and on the backside of the split bit some extra pieces of disarticulated trilobite were visible (see middle of image below). Additional note of interest : specimens of this species are but rarely found complete. Usually (as in this case) the librigenae (free cheeks) are missing.
