

Cyphaspides malberthii (Basse & Mueller, 2016) (TH619)

Cyphaspides → Aulacopleurida → Aulacopleurina → Aulacopleuroidea → Cyphaspidinae

Provenance : Germany, Eifel region, Schaumberg an der Lahn

Formation : Rupbach Schiefer

Age : Lower Devonian (Upper Eifelian)

Details : Only a disarticulated thoracopygidium, and in somewhat eroded conditions, but apparently enough for the reliable person whom found and consequently sold it to me, to make an identification of the specimen with confidence. I'm sorry having to admit not having found an author for the species.
