

Protolenus (Hupeolenus) aff. termierelloides (Geyer, 1990c) (TH272)

→ ***Hamatolenus vincenti*** Geyer & Landing, 2004 (TH122b)

Hamatolenus → Ptychopariida → Ptychopariina → Ellipsocephaloidea → Ellipsocephalidae (old classification)
Redlichiida → Redlichiina → Ellipsocephaloidea → Ellipsocephalidae (new classification 2022)

Provenance : Morocco; Tinejdad, Tourach

Formation : Jbel Wawrmast Fm

Age : Early Middle Cambrian

Details : Part (internal imprint) of complete specimen. Reminding you (again) that the Ellipsocephaloidea were taken out of Ptychopariida by Pedersen, Geyer et al. (2022). Although this specimen came with “Authentication Certificate” (which I cut out of the first image in order not to implicate the vendor – NOT a Moroccan, by the way!), this turned out to an “ordinary” (for already in collection) ***Hamatolenus vincenti***...forcing me to integrate a species unto the numbering (the alternative would've been to re-do all the files following this one!)
