

***Ceratarges* sp.** (TH394)

Ceratarges → Lichida → Lichiina → Lichoidea → Lichidae → Ceratarginae

Provenance : Belgium; from a pasture in the Couvin area

Formation : ?Jemelle Fm

Age : Devonian, (?Eifelian)

Details : To my knowledge, this is quite a unique specimen. Indeed, I've never come across images of a complete specimen from Belgium (sporting also the spines). Sorry for the low-quality images.
