

Ichnofossil/ Cruziana (C6)

Provenance : France; Maine-et-Loire, La Meignanne

Formation : ? Fm

Age : Middle Ordovician

Details : This is one of two gifts of cruziana (see also C5) by my good friend Guy whom, up until 3 years ago (writing this in 2024) was a frequent stand holder at our club's Paleforum. It's just too bad that his health no longer allows him to attend our show, but then again it cannot be helped : the relatively long trip to get there from his corner of France (vicinity of Angers) can indeed be quite stressful.

Gifted on : 5-7/10/2018

Gifted at : Camping near Comblain-au-Pont

Event : Paleoforum 2018

Above a general view on the ichnofossil, on the next page
Detail images made with different lighting/ angles.

Funny touch : another french friend of mine called these "bilobites"
(I've since learned that he's far from being the only one to do so).
