

Estaingia (Hsuaspis) bilobata Pocock, 1964 (TH389 + TH389a-b)

Estaingia → Redlichiida → Redlichiina → Ellipsocephaloidea → Estaingiidae

Provenance : Australia; Kangaroo Island, Big Gully

Formation : Emu Bay Shale

Age : Lower Cambrian

Details : Complete specimen plus thoracopygidium. In order to fit the stone in its box, I sawed off part of the matrix, and in doing so I found a tiny cranidium (plus counterpart). Sorry for the low-quality images.
