

Niobella subinsignis (Thoral, 1935) (TH605)

Niobella → Asaphida → Asaphina → Asaphoidea → Asaphidae

Provenance : France; Montagne Noire, Saint-Chinian

Formation : Saint-Chinian Fm

Age : Lower Ordovician (Tremadocian)

Details : Complete specimen (as internal mould, with partial external mould as counterpart). ***Niobella*** is a subgenus of ***Niobe*** and is a rather rare find in the Montagne Noire. (more info further on)

Bought on : 21/06/2023

Bought at : Val2, Sainte-Marie-aux-Mines

Event : SmaM 2023

Above first the internal mould. Images acquired by photography with different lighting angles.
Below the partial counterpart (external mould). Same remark about the images.
