

Elrathia antiquata (Salter, 1859) (TH546)

Elrathia → Aulacopleurida → Aulacopleurina → Aulacopleuridea → Alokistocaridae

Provenance : US; Alabama, Floyd County

Formation : Conasauga Shale

Age : Cambrian

Details : Almost complete specimen missing the librigenae. Bottom images were made with different lighting angles in an effort to bring out more surface details. [The Alokistocaridae were formerly placed within the Ptychopariida – which was a “dumping place” for trilobites unplaceable in a certain Order. Today, “Ptychopariida” has become unacceptable, and trilobites of uncertain affinity are therefore placed under “Uncertain Order”; The Conasauga Shales are Middle to Upper Cambrian in age]
