

Lonchodomas mcgheeii Decker, 1931 (TH407 + 407a)

Lonchodomas → Trinucleida → Trinucleina → Trinucleoidea → Raphiophoridae

Provenance : United States; Oklahoma, Carter County

Formation : Viola Fm

Age : Lower Ordovician

Details : Complete specimen alongside a cephalon with partial bits of 2 thorax segments attached. Detail images of complete specimen done with different lighting angles. Some controversy in the info given and info found. According to Biolib.cz, the Viola Limestone Fm is actually Middle to Upper Ordovician! Also, according to Wikipedia, *L. mcgheeii* (synonym *Ampyx mcgheeii*) would be from southern Oklahoma's Bromide Fm (also Upper Ordovician).
