

***Asaphellus* sp.** (TH629)

Asaphellus → Asaphida → Asaphina → Asaphoidea → Asaphidae

Provenance : Morocco; Jbel Ben Dalala (central-eastern Fezouata Plains)

Formation : Fezouata Fm

Age : Lower Ordovician

Details : Complete specimen in part-counterpart moulds. Rather than shoving it into *A. fezouataensis* (which, although it can grow up to pretty large specimens), I decided to put the piece (originally numbered 23BD-01) in the collection under a new catalog number (evidently, what with the necessity to start up this website as a platform for the humanitarian project, it took me some time to start evaluating the material I brought back from my most recent Moroccan Trilobite Hunt). First close-up images are of the internal mould.

Bought on : 05/03/2023

Bought at : Tisguine village

Event : Moroccan Trilobite Hunt 2023
