

***Paralejurus "beaumonti"*** (TH144)

*Paralejurus* → Corynexochida → Illaenina → Illaenoidea → Styginidae (Scutelluidae) → Paralejurinae

**Provenance** : Morocco; ?Jorf

**Formation** : ?Boutchafrine Fm

**Age** : Lower Devonian, ?Pragian

**Details** : Did you notice that bit of orthoceras in the top picture? Pity they didn't prep that out decently as well, but then, the specimen wasn't actually complete, and just maybe its preservation wasn't up to standards either? First extra detail photos are full-frontal (regrettably one cannot see the eye's detail in the picture, but one can see the striae on the glabella rather clearly) and posterior (where the pygidinal lines are barely visible). Additional lateral photos below. I have a slight suspicion that the exoskeleton may have been "painted" for dramatic contrast effect.

**Bought on** : 06/09/2015

**Bought at** : Sint-Gillis-Waas

**Event** : BVP 2015
