

Harpidella (Maurotarion) christyi (Hall, 1864) (TH622)

Harpidella → Aulacopleurida → Aulacopleurina → Aulacopleuroidea → Aulacopleuridae

Provenance : US, Indiana, Waldron

Formation : Waldron Shale

Age : Middle Silurian

Details :Enroled specimen (only partly uncovered of matrix). Some controversy (for me) in the namegiving : whether it is *Harpidella* or *Maurotarion*...that is the question! I would be truly glad for someone to give me a positive answer to that query.
