

**?Peronopsis sp.** (TH369)

*Peronopsis* → Agnostida → Agnostina → Agnostoidea → Peronopsidae

**Provenance** : Czech Republic; Buchava nel Babka

**Formation** : Jince Fm

**Age** : Middle Cambrian

**Details** : A friend vendor was offered a box of Czech trilobites (mostly bits), and asked me to make an evaluation of the content (some tags had been displaced). In the end, I was offered the box at the little money I had left that day. The tag on the packing paper read "**Peronopsis sp.**", and I guess that's what I have to use here...being unable to find specific identification markers on the tiny half-trilobite to either confirm or contradict the ID (it was even hard difficult enough to photograph). From a nodule. Arrow on the stone left in the first image indicates the spot where the (partial) trilobite can be found. The counterpart external imprint (recognizable by the darker brown colour) is more or less in the middle of the detail photo.

**Bought on** : 02/12/2018

**Bought at** : CC 't Spoor, Harelbeke

**Event** : Lithos, 2018
