

Harpetidae gen. & sp. indet. (TH149)

?*Eskoharpes* → Harpida → Harpina → Harpoidea → Harpetidae

Provenance : Belgium; Frasnes-lez-Couvin, Carrière du Lion

Formation : Grand Breux Fm, Boussu-en-Fagne Member

Age : Upper Devonian, Middle Frasnian

Details : Partial left side of cephalon (original numbering HT/FLC-72). According to Allart van Viersen, the specimen shows remarkable resemblance to *Eskoharpes*, of the last genera of Harpida, with flattened axial exoskeleton. Van Viersen mentioned the find in two papers of his (2011's *Late Devonian (Frasnian) asteropygine trilobites from the Frasnes area, southern border of Dinant Synclorium, Belgium* and 2018's *The rise and fall of Late Devonian (Frasnian) trilobites from Belgium: taxonomy, biostratigraphy and events*).

Found on : 24/11/2009

Found at : Carrière du Lion, Frasnes-lez-Couvin, Belgium
