

***Koneprusia* sp. (cf. *dahmani*)** Chatterton et al., 2006 (TH321)

*Koneprusia* → Odontopleurida → Odontopleurina → Odontopleuroidea  
→ Odontopleuridae → Koneprusinae

**Provenance** : Morocco; Timrzit

**Formation** : ? Fm

**Age** : Lower Devonian

**Details** : Complete specimen with beautiful spine-on-spine prep. Notice the great prep quality on the smaller spines, and also notice that on the first 2 thorax segments, one finds 2 axial spines (which are subsequently followed-up by single axial spines). Too bad that the matrix around the exoskeleton was apparently smoothed out by sandblasting with iron powder (making for that darkened discoloration).
