

“Paradoxides” *briareus* (TH101)

Paradoxides → Redlichiida → Redlichiina → Paradoxidoidea → Paradoxididae

Provenance : Morocco; Djebel Ougnat

Formation : [should be Jbel Wawrmast] Fm

Age : Middle Cambrian

Details : Complete specimen, part & counterpart (image of the latter at the bottom). Sold to me under wrong name (hence the “*Paradoxides*”) and, at only 30mm length, I thought at first it might be an ***Acadoparadoxides briareus*** (Geyer, 1993) juvenile (I count 15-16 thorax segments in this specimen, 18 in a larger specimen of ***A. briareus*** in my possession). However, the node on the occipital ring is not seen on ***A. briareus***.
