

Tomagnostus fissus (Lundgren, 1879) (TH349e)

Tomagnostus → Agnostida → Agnostina → Agnostoidae → Ptychagnostidae

Provenance : UK; Southern Wales, Penbrookshire, St. Davids, Solva

Formation : ? Fm

Age : Cambrian

Details : A single half specimen (hard to tell whether they're cephalon or pygidium), in apparently slightly different sediment. Sorry for the lousy detail image (I promise/hope to correct that, some day). Addition to the collection thanks to Ton Achterbos.

Bought on : 11/11/2018

Bought at : Zaal Wijgmael, "Rotselaar"

Event : PaleoTime 2018
