

***Lioharpes* sp.** (TH244)

*Lioharpes* → Harpida → Harpetina → Harpetoidae → Harpetidae

**Provenance** : Morocco; Oued el Atchaana

**Formation** : Ihandar Fm

**Age** : Lower Devonian, Pragian

**Details** : Complete specimen, sold to me as “*Neoharpes*” (non-existing; but *Lioharpes* was reported from Atchaana, so I’m assuming that’s what we’re dealing with here). The pinkish lithology is not typical for the site. The additional images (next page) were made in an attempt to showcase the bulbosity of the glabella.
