

***Hemirhodon amplipyge*** Robison, 1964 (TH561)

*Hemirhodon* → Corynexochida → Corynexochina → Corynexochoidea → Dolichometopidae

**Provenance** : USA; Utah, Marjum Pass

**Formation** : ? Fm

**Age** : "Upper" Cambrian

**Details** : Incomplete specimen from old collection (and in spite of being as incomplete as it is, I was lucky to get it, as these trilobites rarely seen on the Belgian market). Additional info from own files : Marjum Pass is in the House Range; the species is found in the Middle Marjum Fm, which is Middle Cambrian in age (not as indicated on the info which came with the specimen).

**Bought on** : 13/11/2022

**Bought at** : De Mixx, Herselt

**Event** : PaleoTime 2022
