

Peronopsis (= Itagnostus) interstricta (White, 1874) (TH19b-e)

Peronopsis (Itagnostus) → Agnostida → Agnostina → Agnostoidea → Peronopsidae

Provenance : USA; Utah, House Range

Formation : Wheeler Fm

Age : Middle Cambrian

Details : Two complete & 2 disarticulated specimens on one piece

Bought on : Sept. 2013

Bought at : Brussels, Auto World

Event : International Minerals & Fossil Fair 2013

From left to right, here's first the complete specimen on the left

...then the half one on its right.

The one on the right of that one, is actually a broken up specimen (with the missing part of the previous one underneath)...

...and the last one (extreme right of the piece)...

...is also visible on the ventral side (backside of the piece).
