

***Spencia typicalis*** Resser, 1939 (TH586)

***Spencia*** → Order Uncertain (ex-Ptychopariida) → Ptychopariidae

**Provenance** : US; Utah

**Formation** : Spence Shale (Mbr of Langston) Fm

**Age** : Middle Cambrian

**Details** : Near-complete, but slightly eroded, specimen. As you can see in the close-up images (which were made with different lighting angles in an effort to show more surface details) a portion of the posterior part of the trilobite (left thorax and pygidium) is missing (most probably due to an unfortunate loss during extraction).

**Bought on** : 20/06/2023

**Bought at** : VE-2, Sainte-Marie-aux-Mines

**Event** : SMaM 2023
